

'Peachy Seduction' USPP#22262 'Sunny Seduction' (PBR Applied For on all.  
'Saucy Seduction' USPP#20782 USPP#20808 'Strawberry Seduction' available in  
'Strawberry Seduction' USPP#18401 North America only)

**License for propagation is required**

**TRANSPLANT LINERS**

Pot Size: Transplant liners into 6- to 8-inch (15 to 20 cm) pot with one cell per pot.

**MEDIA:** Porous soil with good drainage.

**VERNALIZATION TRIALS:** Vernalization trials are executed by placing cell flats in a cold greenhouse set at 38°F (3°C) for 10, 5 and 0 weeks. Fluctuations in temperature occur based on natural day and nighttime temperatures in Lancaster, PA, USA)

**VERNALIZATION TRIAL RESULTS:** Not required for flowering. Respond to long days. Plants will flower earlier with vernalization.

- **Achillea 'Peachy Seduction':** Flowered in 12 weeks after transplant of a 72-cell liner vernalized for 10 and 5 weeks. Flowered in 13 weeks after transplant of an unvernallized 72-cell liner.
- **Achillea 'Saucy Seduction':** Flowered in 12 weeks after transplant of a 72-cell liner vernalized for 10 and 5 weeks. Flowered in 13 weeks after transplant of a 72-cell liner that had no vernalization.
- **Achillea 'Strawberry Seduction':** Flowered in 12 weeks after transplant of a 72-cell liner vernalized for 10 weeks. Flowered in 13 weeks after transplant of a 72-cell liner that had no vernalization.
- **Achillea 'Sunny Seduction':** Flowered in 11 weeks after transplant of a 72-cell liner vernalized for 10 and 5 weeks. Flowered in 12 weeks after transplant of a 72-cell liner that had no vernalization.

**VARIETY FEATURES**

- Great pot performers
- Upright, columnar habit; excellent flowering uniformity
- Very heat and humidity tolerant
- Long-blooming, mid-June through July
- Robust disease-resistant foliage
- Unique color palette

## GROWING ON

**MEDIA pH:** Optimum not tested. Standard for 1-gallon (4 litre) pot is 5.5 to 6.5.

**MEDIA EC:** Optimum not tested. Standard for 1-gallon (4 litre) pot is 1.5 to 3.

**MOISTURE:** Plants should be grown on the dry side.

**FERTILIZER:** While actively growing, plants perform well with a constant liquid feed of 150 ppm nitrogen.

**SUPPLEMENTAL LIGHTING:** *Achillea* is a facultative long-day plant and will flower under any photoperiod according to Michigan State, but flowering is most rapid, uniform, and consistent under long days. For best flowering results, use of supplemental light is not recommended to force flowering with vernalized or unvernallized plugs.

**TEMPERATURE:** If finishing in the greenhouse, heat set at 68°F (20°C) night temperature with venting at 72°F (22°C) is sufficient. Recommend natural-season greenhouse finishing only.

**COMMON PESTS:** Aphids.

**COMMON DISEASES:** None seen.

**PINCHING:** Not necessary.

**CROP MAINTENANCE:** After first flush of flowering, plants can be cut back for a light rebloom as day length changes or if given long days.

**GROWTH REGULATORS:** Not trialed. Not necessary unless holding a long time in 6- or 8-inch (15 or 20 cm) pots.

## SCHEDULING RECOMMENDATIONS

Recommend planting vernalized liners for fastest and most uniform flowering. See Vernalization Trial Results section for timing.

## SPECIAL FEATURES

Breakthrough collection of Achilleas in four bold colors. Ideal for the landscape with upright, sturdy branching and excellent flower canopy uniformity. Great for summer pot crop production outdoor. From Takii (Sahin breeding in The Netherlands). Must Have Perennials® introductions.

**'Peachy Seduction'** has lush green foliage with the same strong sturdy structure of the other members of the Seduction series, but with bright peach-colored flowers that seem to glow. Flowers do not fade quickly.

**'Saucy Seduction'** has a deep rose flower canopy with strong, sturdy stems.

**'Strawberry Seduction'** has thick, dark green foliage and sturdier stems, with better branching and shorter internodes than Achillea 'Paprika'. Red flowers with yellow centers.

**'Sunny Seduction'** has a tight flower canopy compared to Moonshine. Excellent flower uniformity and spectacular yellow color. Slightly ahead in flowering than other two varieties.

## GARDEN STATISTICS:

### 'Saucy Seduction'

**LIGHT:** Full sun

**HEIGHT (THIRD YEAR):** 27 inches (69 cm)

**SPREAD (THIRD YEAR):** 26 inches (66 cm)

**USDA HARDINESS ZONE:** 4 to 8

### 'Peachy Seduction'

**LIGHT:** Full sun

**MATURE HEIGHT:** 23 inches (58 cm)

**MATURE SPREAD:** 23 inches (58 cm)

**USDA HARDINESS ZONE:** 4 to 8

### 'Strawberry Seduction'

**LIGHT:** Full sun

**MATURE HEIGHT:** 18 to 20 inches (46 to 51 cm)

**MATURE SPREAD:** 32 inches (81 cm)

**USDA HARDINESS ZONE:** 4 to 8

### 'Sunny Seduction'

**LIGHT:** Full sun

**HEIGHT (THIRD YEAR):** 27 inches (68 cm)

**SPREAD (THIRD YEAR):** 26 inches (66 cm)

**USDA HARDINESS ZONE:** 4 to 8

## CONTAINER STATISTICS:

### 'Peachy Seduction'

**LIGHT:** Full sun

**MATURE HEIGHT:** 26-27 inches (66-68 cm)

### 'Saucy Seduction'

**LIGHT:** Full sun

**MATURE HEIGHT:** 28 inches (70 cm)

### 'Strawberry Seduction'

**LIGHT:** Full sun

**MATURE HEIGHT:** 27 inches (69 cm)

### 'Sunny Seduction'

**LIGHT:** Full sun

**MATURE HEIGHT:** 28 inches (71 cm)
